

Why Poolheating Ltd

Performance—The Poolheating Ltd evacuated tube system is the highest performing system on the market. See the Energywise website for all independent test results: www.energywise.govt.nz.

Durability—Our American made plastic components are all UV stable, powder coated marine grade aluminium frames and 316 A4 stainless bolts mean no rust, condensation is not possible inside the sealed tubes.

Aesthetics—Our tube spacing means we pack more punch in a smaller area! Good design enables the pipework to be hidden behind the collector and the frames behind the tubes. All this comes together to give an aesthetically pleasing system on your roof.

Service—Solar is what we do! Poolheating Ltd are experts in our field with nationwide trained installers in every corner of the country. We can meet your needs from small to large commercial users. Our freephone number is available nationwide.

Poolheating Ltd is a full member of the Solar Association—sort of a Master Builders for solar.

Price & Finance—For the top performing system available that money can buy, you would expect to pay more. We at Sunshine Solar have priced our systems well below market rates and with bank finance and incentives from major banks you can be saving more than your repayments.

Warranty Poolheating Ltd panels come with a 10 year warranty, giving you peace of mind.

Free solar panel*

Kiwi bank.

If you have a kiwi bank mortgage, you can add a sustainable energy loan, making it even easier to save on your power bill!

As well as their great interest rates, Kiwi bank will also contribute \$2,000 to the cost of your solar, effectively giving you a free solar panel!

*Kiwi Bank conditions apply.

Did you know?

Hot water typically makes up 30–50% of your homes energy bill!

Typical household power savings, —based on a \$300 power bill.

With a monthly hot water bill for most average families over \$100 and with power likely to at least double in the next 10 years, that represents \$20,000 you are likely to spend on heating water over this time.

You could save up to 85% of this with a solar water heating system from Poolheating Ltd
